

TESTING SERVICES

Our dedicated professionals uphold a standard of excellence when performing analytical services on your behalf. Strict adherence to procedural detail and a strong sense of urgency ensure the accuracy and timeliness of our analyses.

Laboratory Service provides sampling and testing services around the clock, for all stages of bulk chemical discharge or shipment via marine vessel, rail, isocontainer or tank wagon. In addition, our staff consults closely with our customers during product development, custom blending, and ongoing quality control verification. Our capabilities include complete wet analysis as well as GC, IR and UV spectroscopy.

Our analytical results may be reported on computer-generated certificates of analysis using your letterhead or ours, and transmitted via fax or email.

Laboratory Service is accredited by the FDA as approved for testing products to meet USP and NF specifications. We are also a US Customs approved laboratory for performing quality verification of materials in international trade.

MARINE SURVEYING

Laboratory Service is a US Customs approved independent gauging and inspecting service, ready to protect your interests and help you manage risk during transfer operations. As your bulk chemicals are transported, traded or distributed, Laboratory Service provides inspection and surveying services, including:

- On-site operational representation
- Terminal and vessel operations monitoring
- Shore tank and pipeline inspection
- Quantity/Loss control and investigation
- Sampling at custody transfer
- Inspection of ship and barge tanks, road and rail tankers, shore tanks and line systems for suitability to load/store/transfer products
- Audit inventories and product identification
- Advise on causal factors and remediation of contaminated products

Our experienced Marine Department staff in New Jersey service the New York Harbor area, including Rhode Island to Virginia. Our Seabrook, TX staff handles the Gulf Coast/Houston Ship Channel areas.

SAMPLING SERVICES

Laboratory Service can also offer the following services to our clients:

- Sampling of products from drums, railcars, tank wagons, isocontainers, and storage tanks
- Retain and disposal of samples
- DOT and IATA compliant packaging and documentation; shipment of hazardous and non-hazardous samples by regular and overnight carriers.
- Custom blending and testing of samples to customer specifications

LABORATORY SERVICE INC.

Laboratory Service, Inc. is a privately held company specializing in the quality and quantity control of chemical and petrochemical products. Incorporated in New Jersey in 1949, with a regional office in Seabrook, TX, we have earned a reputation for accuracy, integrity and dependability in the chemical industry.

At Laboratory Service, our primary objective is customer satisfaction. We provide our clients with a one-call source for a broad range of services, including sampling, testing, inspection, survey, and shipment of our customers' valuable products.

Our clients include many Fortune 500 companies, as well as manufacturers, distributors and traders from all facets of the industry.

Laboratory Service is ISO 9001-2000 certified by DNV.
